

CS 690: Human-Centric Machine Learning

Final Project, Part 2

This is a mid-project check-in to ensure that you are making progress, as well as an opportunity to get feedback and modify your plans, if necessary. Submit a 1–2 page document that contains the following:

- A short paragraph summarizing of your project and core contribution(s)
- A description of all work completed and/or initial results from literature survey, theoretical work, implementation, experiments, and analysis
- Related to the above, a list of your hypotheses from the project proposal and progress on testing each of time
- Any surprises or changes that you think need to be made
- Points that you may be stuck on or confused about
- A brief timeline for milestones that will allow you to complete the project on time
