	and the second s		lat of	a
Year 1900	Computers and The Internet	General Technology Events	Births	Deaths
1901		First trans-Atlantic radio (Marconi).		
1902 1903		Wright Brothers 1st Flight. Ford founded.	My Dad's Mom (d1995).	
1904		Vacuum tube.	My Dau's Moill (u1993).	
1905		Tube and the second sec	Chala Tambanah (14007)	Last War of 1812 vet (b1800).
1906 1907		Tube amplifier. AM radio transmissions.	Clyde Tombaugh (d1997).	
1908		Geiger counter.		
1909 1910		Dental braces.		
-	IBM founded.	Dental praces.		
1912 1913		The Bro Steinless steel	My Mom's Mom (d1995). Turing (d1954).	Titanic sinks (1514 dead).
1913		The Bra. Stainless steel. World War I starts. Liquid fuel rocket.		
1915				Lusitania sunk by torpedo (1198 dead).
1916 1917			Claude Shannon (d2001).	
1918		World War I ends.		
1919 1920		First licensed commercial radio.		
1921		That he had commercial radio.		
1922		Radar.	A4 (- January (12044-2042)	
1923 1924		Television demonstrated.	My in-laws (d2011,2012).	
1925			Douglas Englebart (d2013).	
1926 1927			My father (d2011).	
1928		First electronic TV demonstrated.	, (uzuzi).	
1929		Regular TV broadcasts start (Germany).	Noil Armetrong (-12012) 15T	
1930 1931		Pluto discovered (Tombaugh).	Neil Armstrong (d2012) 1ST man on moon.	
1932		Radio telescope.		
1933 1934		FM radio patented.	Gene Cernan (d2017) last man on moon.	
1935			My mother.	Konstantin Tsiolkovsky (b1857) - Theory of Spaceflight.
1936	Dealess lesis residented by the letters of	Berlin Olympics telecast.		
1937	Boolean logic performed by relays (Shannon).	Jet engines demonstrated.		
1939	Atanasoff-Berry Computer.	World War II starts. First jets fly.		
1940	Zuse Z3 (Germany).	NTSC (B&W) TV standard in US.		
1942	euse 25 (dermany).	Wise (baw) iv standard in os.		
	Colossus Mark 1. ASCC (Harvard Mark I). Colossus Mark 2.	Aqualung (Cousteau).		
1944	ASCC (Harvard Wark I). Colossus Wark 2.	Messerschmitt 262 jet operational. Atom bombs dropped. WW II ends.		Robert Goddard (b1882) - Liquid Fueled Rockets.
	ENIAC.	Theory of Communication (Shannon).		
1947 1948	"A Mathematical Theory of Communication" (Shannon).	Transistor. AK-47.		
1949		USSR A-Bomb. Radiocarbon dating.		
1950	Turing Test described (Alan Turing).		Steve Wozniak.	
	UNIVAC, EDVAC, Whirlwind, Ferranti Mark 1.	First commercial jet takes passengers.		
1951 1952 1953		NTSC adapted for color TV.		
1951 1952 1953 1954	IBM 704. Work on FORTRAN starts.		Me, Berners-Lee, Gates, Jobs (d2011).	Alan Turing (b1912) - Early Computer Scientist. Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956	IBM 704. Work on FORTRAN starts. Hard drives.	NTSC adapted for color TV. Nuclear power plants.	Me, Berners-Lee, Gates, Jobs (d2011).	Alan Turing (b1912) - Early Computer Scientist. Albert Einstein (b1879). Last Civil War veteran (b1847).
1951 1952 1953 1954 1955 1956 1957	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched.	Me, Berners-Lee, Gates, Jobs (d2011). My wife.	Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 7090. Work on COBOL starts.	NTSC adapted for color TV. Nuclear power plants.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959 1960	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959 1960 1961	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 7090. Work on COBOL starts.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959 1960 1961 1962 1963	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released. First COBOL compiler released. First Computer game: SpaceWarl. Computer mouse developed (Englebart).	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED).		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959 1960 1961 1962 1963 1964	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 7090. Work on COBOL starts. First LSP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer mouse developed (Englebart). IBM 360, CDC 6600.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin).		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959 1960 1961 1962 1963 1964 1965 1966	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer game SpaceWarl. Computer game developed (Englebart). IBM 360, COC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED).		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959 1960 1961 1962 1963 1964 1965 1966 1967	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LSP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer mouse developed (Englebart). IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LOGO language.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1959 1960 1961 1962 1963 1964 1965 1966 1967 1968	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer mouse developed (Englebart). IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LOGO language. Apollo Guidance Computer first flight (Apollo 7). ARPANET (4 hosts). Telnet developed.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin).		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1960 1961 1962 1963 1964 1965 1966 1967 1968 1969	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LSP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer mouse developed (Englebart). IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LOGO language. Apollo Guidance Computer first flight (Apollo 7). ARPANET [4 hosts]. Telnet developed. UNIX development starts. [13 hosts]	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8).		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1960 1961 1962 1963 1964 1965 1966 1967 1968 1969 1970	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer mouse developed (Englebart). IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LOGO language. Apollo Guidance Computer first flight (Apollo 7). ARPANET (4 hosts). Telnet developed.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin).		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1960 1961 1963 1964 1965 1966 1967 1968 1969 1970 1971 1971	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LSP interpreter released. First COBOL compiler released. First COBOL compiler released. First COBOL compiler released. COMPUTER TOWNS (First COMPUTER) IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LOGO language. Apollo Guidance Computer first flight (Apollo 7). ARPANET [4 hosts]. Telnet developed. UNIX development starts. [13 hosts] FIP protocol. First microprocessor chips. [23 hosts] [31 hosts] Email standardization proposed (Email 75% of traffic).	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First humans orbit Moon (Apollo 8). Spirst Moon landing (Armstrong & Aldrin). Pocket calculator. Apollo 13 aborts. Sixth Moon landing (Cernan & Schmitt). First mobile phone demonstrated.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1960 1961 1962 1963 1964 1965 1966 1967 1968 1969 1970 1971 1971	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer mouse developed (Englebart). IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LOGO language. Appollo Guidance Computer first flight (Apollo 7). ARPANET [4 hosts]. Telnet developed. UNIX development starts. [13 hosts] FTP protocol. First microprocessor chips. [23 hosts] [31 hosts] Email standardization proposed (Email 75% of traffic). TCP/IP described. "Internet" coined. [62 hosts]	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin). Pocket calculator. Apollo 13 aborts. Sixth Moon landing (Cernan & Schmitt). First mobile phone demonstrated. Pioneer 11 Jupiter fly-by.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1960 1961 1962 1963 1965 1966 1967 1968 1969 1970 1971 1972 1973 1974 1975 1975	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LSP interpreter released. First COBOL compiler released. First COBOL compiler released. First COBOL compiler released. First COBOL compiler released. LOCOPUTER OF COMPILER CO	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin). Pocket calculator. Apollo 13 aborts. Sixth Moon landing (Cernan & Schmitt). First mobile phone demonstrated. Pioneer 11 Jupiter fly-by. Apollo-Soyuz test project. Viking I & II probes land on Mars.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1960 1961 1963 1964 1965 1969 1969 1970 1971 1972 1973 1974 1975 1976 1976	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released. First COBOL compiler released. First COMPLET GAME (First Integrated Circuits). IBM 360, CDC 6600. CDC 300. Packet Switching described. ILLIAC IV contracted. LOGO language. Apollo Guidance Computer first flight (Apollo 7). ARPANET [4 hosts]. Telnet developed. LUNIX development starts. [13 hosts] FIT protocol. First microprocessor chips. [23 hosts] (31 hosts) Email standardization proposed (Email 75% of traffic). TCP/IP described. "Internet" coined. [62 hosts] UNIX marketed. Apple [], Tandy TRS-80 released. [111 hosts]	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin). Pocket calculator. Apollo 13 aborts. Sixth Moon landing (Cernan & Schmitt). First mobile phone demonstrated. Pioneer 11 Jupiter fly-by. Apollo-Soyuz test project.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1960 1961 1962 1963 1964 1965 1966 1967 1970 1971 1972 1973 1974 1975 1977 1978	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LSP interpreter released. First COBOL compiler released. First COBOL compiler released. First COBOL compiler released. First COBOL compiler released. LOCOPUTER OF COMPILER CO	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin). Pocket calculator. Apollo 13 aborts. Sixth Moon landing (Cernan & Schmitt). First mobile phone demonstrated. Pioneer 11 Jupiter fly-by. Apollo-Soyuz test project. Viking I & II probes land on Mars.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1957 1962 1963 1964 1965 1966 1967 1970 1971 1972 1973 1974 1975 1976 1977 1978	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LISP interpreter released. First COBOL compiler released. First COBOL compiler released. First computer game: SpaceWarl. Computer mouse developed (Englebart). IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LILIAC IV contracted. LOGO language. Apollo Guidance Computer first flight (Apollo 7). ARPANET [4 hosts]. Telnet developed. LINIX development starts. [13 hosts] FTP protocol. First microprocessor chips. [23 hosts] [31 hosts] Email standardization proposed (Email 75% of traffic). TCP/IP described. "Internet" coined. [62 hosts] UNIX marketed. Apple [J. Tandy TRS-80 released. [111 hosts] Visicals spreadsheet for Apple [J. Usenet user groups. [188 hosts]	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer I launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin). Pocket calculator. Apollo 13 aborts. Sixth Moon landing (Cernan & Schmitt). First mobile phone demonstrated. Pioneer 11 Jupiter fly-by. Apollo-Soyuz test project. Viking 1 & II probes land on Mars. Voyager 1 & 2 launched. Walkman. CD invented.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1963 1961 1962 1963 1964 1965 1966 1967 1970 1971 1972 1973 1974 1975 1978 1978 1978 1978 1978	IBM 704. Work on FORTRAN starts. Hard drives. First FORTRAN compiler released. IBM 709. ARPA established. First integrated circuits. IBM 709. Work on COBOL starts. First LSP interpreter released. First COBOL compiler released. First COBOL compiler released. First COBOL compiler released. First COBOL compiler review (Englebart). IBM 360, CDC 6600. CDC 3300. Packet Switching described. ILLIAC IV contracted. LOGO language. Apollo Guidance Computer first flight (Apollo 7). ARPANET [4 hosts]. Telnet developed. JUNIX development starts. [13 hosts] FTP protocol. First microprocessor chips. [23 hosts] 131 hosts] Email standardization proposed (Email 75% of traffic). TCP/IP described. "Internet" coined. [62 hosts] UNIX marketed. Apple [], Tandy TRS-80 released. [111 hosts] Visicalc spreadsheet for Apple []. Usenet user groups. [188 hosts] Flash memory developed.	NTSC adapted for color TV. Nuclear power plants. Sputnik launched. Explorer 1 launched. Luna 3 photographs far side of Moon. First man in space (Yuri Gagarin). First practical Light Emitting Diodes (LED). Mariner 4 flies past Mars. First humans orbit Moon (Apollo 8). First Moon landing (Armstrong & Aldrin). Pocket calculator. Apollo 13 aborts. Sixth Moon landing (Cernan & Schmitt). First mobile phone demonstrated. Pioneer 11 Jupiter fly-by. Apollo-Soyuz test project. Viking 1 & II probes land on Mars. Voyager 1 & 2 launched. Walkman. CD invented. Walkman. CD invented. Voyager 1 Saturn & Titan fly-by. First space shuttle "Columbia" launch.		Albert Einstein (b1879).
1951 1952 1953 1954 1955 1956 1957 1958 1960 1961 1962 1963 1964 1965 1966 1967 1970 1971 1972 1973 1974 1975 1978 1979 1979 1980 1981 1982 1983 1983	IBM 704. Work on FORTRAN starts. Hard drives. 	and the same of th		ar a	- ·
Year	Computers and The Internet	General Technology Events	Births	Deaths
2000	Dot-Com bubble bursts. [1 Billion unique URLs.]	Y2K issues mostly avoided.	Students in CMPSCI 120	
2001	StumbleUpon. Wikipedia. iPod.		Students in CMPSCI 120	Claude Shannon (b1916).
2002	Friendster.			
2003	MySpace, LinkedIn, iTunes, Second Life, 4chan.	STS-107 "Columbia" disintegrates on re-entry.		
2004	Facebook, Flickr, podcasts, WoW. Firefox released.	"Spirit" & "Opportunity" rovers land on Mars. Cassini orbits Saturn. Rosetta launch.		
2005	YouTube, Google Earth. Mac Tiger.	"Huygens" probe lands on Titan (from Cassini).		
2006	Twitter.			
2007	Google Street View. iPhone, Dropbox. Win Vista, Mac Leopard.			
2008	IPv6 added to root servers. [1 Trillion unique URLs.]			
2009	Windows 7. 1.73 Billion Internet users. 90 Trillion emails.	NTSC TV broadcasts replaced by HDTV.		Last Titanic survivor (b1912).
2010	1.97 Billion Internet users. iPad.	4.6 Billion cell phone subscriptions.		
2011	IPv4 exhaustion. IPv6 test day in June. iPad 2. Mac Lion.	ISS construction completed, shuttle retires.		Last Lusitania survivor (b1915). My Dad (b1927).
2012	IPv6 rollout. iPad 3. Windows 8, Mac Mountain Lion.	SpaceX @ ISS, MSL "Curiosity" lands on Mars.		Last WWI vet (b1901). Neil Armstrong (b1930).
2013	3D Printing ramps up. NSA targets encrypted email.	Earth-like exoplanets. Neandertal genome. Higgs boson confirmed.		Douglas Englebart (b1925) - computer mouse.
2014	128Gb microSD. IPv6: 4%. Mac OS-X 10.10 Yosemite.	Drones popular. Voyager I goes interstellar. Rosetta/	Philae @ comet.	Roger Easton (b1921) - GPS.
2015	Windows 10 (July). Mac OS-X 10.11 El Capitan.	New Horizons flies by Pluto/Charon		Joseph Traub (b1932) - CMPSCI pioneer.
2016	IPv6: 13%. macOS Sierra (10.12).	Philae lander located. SpaceX lands boosters.		Minsky (b1927) - Al. Tomlinson (b1941) - email.
2017	Major advances in practical quantum computing.	SpaceX launches used booster. Cassini impacts Saturn.		Last person born in 1800s (b1899). Gene Cernan.
2018	Net Neutrality goes away (maybe?).	SpaceX Falcon Heavy. Commercial crews announced for SpaceX & Boeing spacecraft.		John Young (b1930). Paul Allen (b1953).
2019	A.I. Breast cancer diagnostics.	China soft-lands 1st probe on lunar farside. NuScale modular nukes. Lab-grown meat.		My Mom (b1935).
2020	Internet Satellite Mega-Constellations (SpaceX).	COVID-19 Devastates Planet. SpaceX launches astronauts.		Katherine Johnson (b1918). Annie Glenn (b1920)
