

Name: _____

Exercise 6, in-class 10/7/21 – UMass CS 490A

Turn in via Gradescope after class or by next Monday

Closely examine the example project slide (slide 39), then answer the following questions below. These questions may not be fully addressed in the slide, describe any assumptions and/or extrapolations that you make.

1. What is the core question of this project? What does it seek to answer?

2. How does this project operationalize the core question?

3. How are the results of the project evaluated?

4. Come up with 2-3 core research questions that build on or are inspired by this project.
