# Bibliography: ARNOLD L. ROSENBERG

**Books**:

1. (with L.S. Heath): *Graph Separators, with Applications.* Kluwer Academic/Plenum Publishers, New York (2001).

2. *The Pillars of Computation Theory: State, Encoding, Nondeterminism.* Springer Universitext Series. To appear (2009).

**Edited Books**:

1. (coedited with F. Meyer auf der Heide, B. Monien): *Parallel Architectures and Their Efficient Use.* (Proc. of the 1st Heinz-Nixdorf Symp., Paderborn, Germany, 1992) *Lecture Notes in Computer Science 678*, Springer, N.Y. (1993).

2. (coedited with D.F. Hsu and D. Sotteau): *Interconnection Networks and Mapping and Scheduling Parallel Computations.* (Proceedings of the DIMACS Workshop, 1994) *DIMACS Series in Discrete Mathematics and Theoretical Computer Science, vol. 21*, Amer. Math. Soc., Providence, R.I. (1995).

3. (coedited with O. Goldreich and A. Selman): *Theoretical Computer Science: Essays in Memory of Shimon Even. Springer Festschrift series, Lecture Notes in Computer Science 3895*, Springer, Heidelberg (2006).

**Book Chapters**:

1. "Changing challenges for collaborative algorithmics." In *Handbook of Nature-Inspired and Innovative Computing: Integrating Classical Models with Emerging Technologies* (A. Zomaya, ed.) Springer, New York (2006), pp. 1–44.

2. (with G. Malewicz) "A pebble game for Internet-based computing." In *Theoretical Computer Science: Essays in Memory of Shimon Even* (O. Goldreich, A.L. Rosenberg, A. Selman, eds.) *Springer Festschrift series, Lecture Notes in Computer Science 3895*, Springer, Heidelberg (2006) pp. 291–312.

3. "State." In *Theoretical Computer Science: Essays in Memory of Shimon Even* (O. Goldreich, A.L. Rosenberg, A. Selman, eds.) *Springer Festschrift series, Lecture Notes in Computer Science 3895*, Springer, Heidelberg (2006) pp. 375–398.

**Research Publications**:

1. "On $n$-tape finite state acceptors." *5th IEEE Symp. on Switching Circuit Theory and Logical Design*, Princeton, N.J. (1964) 76–81.

2. *Nonwriting extensions of finite automata.* Ph.D. Thesis, Harvard University: Tech. Rpt. BL-39 (1965).

3. "On multihead finite automata." *IBM J. Res. Devel. 10* (1966) 388–394. See also, *6th IEEE Symp. on Switching Circuit Theory and Logical Design*, Ann Arbor, Mich. (1965) 221–228.

4. (with A.R. Meyer): "On the computational complexity of various subclasses of the context-free languages." IBM Research Note NC-644 (1966).

5. "A machine realization of the linear context-free languages." *Inf. Control 10* (1967) 175–188.

6. "Real-time definable languages." *J. ACM 14* (1967) 645–662.

7. "Multitape finite automata with rewind instructions." *J. CSS 1* (1967) 299–315.

8. "Degrees of inherent ambiguity in context-free languages." IBM Report RC-1878 (1967).

9. (with P.C. Fischer): "Multitape one-way nonwriting automata." *J. CSS 2* (1968) 88–101.

10. (with M.J. Fischer): "Real-time solutions of the origin crossing problem." *Math. Syst. Th. 2* (1968) 257–263.

11. (with P.C. Fischer, A.R. Meyer): "Counter machines and counter languages." *Math. Syst. Th. 2* (1968) 265–283. See also, "Real-time counter machines." *8th IEEE Symp. on Switching and Automata Theory*, Austin, Tex. (1967) 148–154.

12. "On the independence of real-time definability and certain structural properties of context-free languages." *J. ACM 15* (1968) 672–679.

13. (with M.J. Fischer): "Limited random access Turing machines." *9th IEEE Symp. on Switching and Automata Theory*, Schenectady, N.Y. (1968) 356–367.

14. "A note on ambiguity of context-free languages and presentations of semi-linear sets." *J. ACM 17* (1970) 44–50.

15. (with P.C. Fischer, A.R. Meyer): "Time-restricted sequence generation." *J. CSS 4* (1970) 50–73.

16. "Data graphs and addressing schemes." *J. CSS 5* (1971) 193–238. See also, *2nd ACM Symp. on Theory of Computing*, Northampton, Mass. (1970) 48–61.

17. "Symmetries in data graphs." *SIAM J. Computing 1* (1972) 40–65.

18. "Addressable data graphs." *J. ACM 19* (1972) 309–340. See also, *3rd ACM Symp. on Theory of Computing*, Shaker Heights, Oh. (1971) 138–150.

19. (with R.M. Karp, R.E. Miller): "Rapid identification of repeated patterns in strings, trees, and arrays." *4th ACM Symp. on Theory of Computing*, Denver, Col. (1972) 125–136.

20. (with P.C. Fischer, A.R. Meyer): "Real-time simulation of multihead tape units." *J. ACM 19* (1972) 590–607. See also, "Turing machines with several read-write heads." *8th IEEE Symp. on Switching and Automata Theory*, Austin, Tex. (1967) 117–127.

21. "Exploiting addressability in data graphs." In *Computational Complexity: Courant Computer Science Symp. 7* (R. Rustin, ed.) Algorithmics Press, N.Y. (1973) 161–183.

22. "Suffixes of addressable data graphs." *Inf. Control 23* (1973) 107–127.

23. "On the time required to recognize properties of graphs: a problem." *SIGACT News 5* (1973) 15–16.

24. "An extrinsic characterization of addressable data graphs." *Discr. Math. 9* (1974) 61–70.

25. "Computed access in ragged arrays." In *Information Processing 74* (J. Rosenfeld, ed.) North-Holland, Amsterdam (1974) 642–646.

26. "Allocating storage for extendible arrays." *J. ACM 21* (1974) 652–670. See also, "Transitions in extendible arrays." *ACM SIGACT-SIGPLAN Symp. on Principles of Programming Languages*, Boston, Mass. (1973) 218–225.

27. (with J.W. Thatcher): "What is a multilevel array?" *IBM J. Res. Devel. 19* (1975) 163–169.

28. "Generalized addressing schemes for data graphs." *Math. Syst. Th. 8* (1975) 353–367.

29. "On storing arbitrarily many extendible arrays of arbitrary dimensions." *Intl. J. Comp. Inf. Sci. 4* (1975) 189–196.

30. "Managing storage for extendible arrays." *SIAM J. Computing 4* (1975) 287–306. See also, *6th ACM Symp. on Theory of Computing*, Seattle, Wash. (1974) 297–302.

31. (with L.J. Stockmeyer): "Techniques for storing extendible arrays." IBM Report RC-5643 (1975).

32. "Preserving proximity in arrays." *SIAM J. Computing 4* (1975) 443–460.

33. (with L.J. Stockmeyer): "Storage schemes for boundedly extendible arrays." *Acta Inform. 7* (1977) 289–303.

34. (with L.J. Stockmeyer): "Hashing schemes for extendible arrays." *J. ACM 24* (1977) 199–221. See also, *7th ACM Symp. on Theory of Computing*, Albuquerque, N.M. (1975) 159–166.

35. "On storing concatenable arrays." *J. CSS 14* (1977) 157–174.

36. "On storing ragged arrays by hashing." *Math. Syst. Th. 10* (1976/77) 193–210.

37. "Direct-access storage of data structures." *Rivista di Informatica VII* (1977) 127–151.

38. "Storage mappings for extendible arrays." Cap. 10 in *Current Trends in Programming Methodology IV: Data Structuring* (R.T. Yeh, ed.) Prentice-Hall, Englewood Cliffs, N.J. (1978) 263–311.

39. "Data encodings and their costs." *Acta Inform. 9* (1978) 273–292.

40. (with J.S. Lew): "Polynomial indexing of integer lattices, I." *J. Number Th. 10* (1978) 192–214.

41. (with J.S. Lew): "Polynomial indexing of integer lattices, II." *J. Number Th. 10* (1978) 215–243.

42. (with L. Snyder): "Minimal-comparison 2,3–trees." *SIAM J. Computing 7* (1978) 465–480.

43. (with L. Snyder): "Bounds on the costs of data encodings." *Math. Syst. Th. 12* (1978) 9–39. See also, *Waterloo Conf. on Theoretical Computer Science* (1977) 30–35.

44. (with R.E. Miller, N. Pippenger, L. Snyder): "Optimal 2,3–trees." *SIAM J. Computing 8* (1979) 42–59. See also, *Waterloo Conf. on Theoretical Computer Science* (1977) 255–261.

45. "On embedding graphs in grids." IBM Report RC-7559 (1979).

46. "A note on paths embedded in trees." *Inf. Proc. Let. 8* (1979) 272–273.

47. "Encoding data structures in trees." *J. ACM 26* (1979) 668–689. See also, *Johns Hopkins Conf. on Information Science and Systems*, Baltimore, Md. (1978) 380–384.

48. "Profile numbers." *Fibonacci Quarterly 17* (1979) 259–264.

49. (with D. Wood, Z. Galil): "Storage representations for tree-like data structures." *Math. Syst. Th. 13* (1979) 105–130. See also, *11th ACM Symp. on Theory of Computing*, Atlanta, Ga. (1979) 99–107.

50. "The hardest natural languages." *Linguisticae Investigationes III* (1979) 323–339.

51. (with R.J. Lipton, A.C. Yao): "External hashing schemes for collections of data structures." *J. ACM 27* (1980) 81–95.

52. (with L. Snyder, L.J. Stockmeyer): "Uniform data encodings." *Theor. Comp. Sci. 11* (1980) 145–165. See also, *Johns Hopkins Conf. on Information Science and Systems*, Baltimore, Md. (1978) 412–417.

53. (with R.E. Miller): "On computing distances between leaves in a complete tree." *Intl. J. Computer Math. 8* (1980) 289–301.

54. "On uniformly inserting one data structure into another." *Comm. ACM 24* (1981) 88–90.

55. "Issues in the study of graph embeddings." In *Graph-Theoretic Concepts in Computer Science: Proceedings of the International Workshop WG80*, Bad Honnef, Germany (H. Noltemeier, ed.) *Lecture Notes in Computer Science 100*, Springer, N.Y. (1981) 150–176.

56. (with L. Snyder): "Time- and space-optimal B-trees." *ACM Trans. Database Systems 6* (1981) 174–183. See also, *ACM SIGMOD Intl. Conf. on Management of Data*, Boston, Mass. (1979) 43–51.

57. "Three-dimensional integrated circuitry." *VLSI Systems and Computations* (H.T. Kung, R. Sproull, G. Steele, eds.) Computer Science Press, Rockville, Md. (1981) 69–80.

58. "Routing with permuters: Toward reconfigurable and fault-tolerant networks." Tech. Rpt. CS-1981-13, Duke Univ. (1981).

59. (with J.-W. Hong): "Graphs that are almost binary trees." *SIAM J. Computing 11* (1982) 227–242. See also, *13th ACM Symp. on Theory of Computing*, Milwaukee, Wisc. (1981) 334–341.

60. (with R. Aleliunas): "On embedding rectangular grids in square grids." *IEEE Trans. Computers, C-31* (1982) 907–913.

61. (with Th. Ottmann, L.J. Stockmeyer): "A dictionary machine (for VLSI)." *IEEE Trans. Computers, C-31* (1982) 892–897.

62. (with H. Edelsbrunner, H.A. Maurer, F.P. Preparata, E. Welzl, D. Wood): "Stabbing line segments." *BIT 22* (1982) 274–281.

63. (with Z. Barzilai, D. Coppersmith): "Exhaustive generation of bit patterns, with applications to VLSI self-testing." *IEEE Trans. Computers, C-32* (1983) 190–194.

64. "A research program in next-generation VLSI." *21st Southeast Region ACM Conf.*, Durham, N.C. (1983) 61–68.

65. (with F.R.K. Chung, F.T. Leighton): "DIOGENES – A methodology for designing fault-tolerant VLSI processor arrays." *13th Intl. Conf. on Fault-Tolerant Computing*, Milan, Italy (1983) 26–32.

66. "Three-dimensional VLSI: A case study." *J. ACM 30* (1983) 397–416. See also, "Three-dimensional VLSI layouts." In *7th Wkshp. on Graph-Theoretic Concepts in Computer Science (WG81)* (J. Muhlbacher, ed.) Carl Hanser Verlag, Vienna (1982) 55–60.

67. (with J.-W. Hong, K. Mehlhorn): "Cost tradeoffs in graph embeddings, with applications." *J. ACM 30* (1983) 709–728. See also, *Automata, Languages, and Programming* (8th Colloquium, Haifa, Israel) *Lecture Notes in Computer Science 115*, Springer, N.Y. (1981) 41–55.

68. (with I.H. Sudborough): "Bandwidth and pebbling." *Computing 31* (1983) 115–139.

69. "The Diogenes approach to testable fault-tolerant arrays of processors." *IEEE Trans. Computers, C-32* (1983) 902–910.

70. "Fault-tolerant interconnection networks: a graph-theoretic approach." *9th Wkshp. on Graph-Theoretic Concepts in Computer Science*, Carl Hanser Verlag, Vienna, 1983, 286–297.

71. (with F.T. Leighton): "Automatic generation of three-dimensional circuit layouts." *1983 IEEE Intl. Conf. on Computer Design*, Rye, N.Y. (1983) 633–636.

72. (with Th. Ottmann, S. Parker, H.W. Six, D. Wood): "Minimal-cost brother trees." *SIAM J. Computing 13* (1984) 197–217. See also, *Theoretical Computer Science: the 4th GI Conf.*, Aachen, Germany. *Lecture Notes in Computer Science 67* (K. Weihrauch, ed.) Springer, N.Y. (1979) 213–221.

73. (with F.R.K. Chung, L. Snyder): "Perfect storage representations for families of data structures." *SIAM J. Algebr. Discr. Meth. 4* (1984) 548–565.

74. "The VLSI revolution in theoretical circles." *Automata, Languages, and Programming* (11th Intl. Colloq., Antwerp, Belgium) *Lecture Notes in Computer Science 172*, Springer, N.Y. (1984) 23–40.

75. (with Th. Ottmann, H. W. Six, D. Wood): "Binary search trees with binary comparison cost." *Intl. J. Comp. and Inform. Sci. 13* (1984) 77–101.

76. "On designing fault-tolerant VLSI processor arrays." In *Advances in Computing Research 2* (F.P. Preparata, ed.) JAI Press, Greenwich, Conn. (1984) 181–204.

77. "A hypergraph model for fault-tolerant VLSI processor arrays." *IEEE Trans. Computers, C-34* (1985) 578–584.

78. "Challenges and opportunities in VLSI theory." *Bull. EATCS 26* (1985) 69–100.

79. (with F.R.K. Chung): "Minced trees, with applications to fault-tolerant VLSI processor arrays." *Math. Syst. Th. 19* (1986) 1–12.

80. "Graph-theoretic approaches to fault-tolerant WSI processor arrays." *Wafer Scale Integration* (C. Jesshope and W. Moore, eds.) Adam Hilger Press, Bristol, 1986, 10–23.

81. (with F.T. Leighton): "Three-dimensional circuit layouts." *SIAM J. Computing 15* (1986) 793–813.

82. "The DIOGENES design methodology: Toward automatic physical layout." In *Parallel Algorithms and Architectures* (M. Cosnard et al., eds.) North-Holland, Amsterdam (1986) 335–348.

83. "Book embeddings and wafer-scale integration." *Congressus Numerantium 54* (1986) 217–224.

84. "DIOGENES, circa 1986." *VLSI Algorithms and Architectures* (1986 Aegean Workshop on Computing) *Lecture Notes in Computer Science 227*, Springer, N.Y. (1986) 96–107.

85. (with F.R.K. Chung, F.T. Leighton): "Embedding graphs in books: A graph layout problem with applications to VLSI design." *SIAM J. Algebr. Discr. Meth. 8* (1987) 33–58. See also, *Graph Theory and Its Applications to Algorithms and Computer Science* (Y. Alavi et al., eds.) Wiley, N.Y. (1985) 175–188.

86. (with J.D. Knott): "The DIOGENES design methodology: On minimizing maximum wire-run." *2nd Intl. Conf. on Supercomputing III*, Boston, Mass. (1987) 260–268.

87. "Graph embeddings 1988: Recent breakthroughs, new directions." *VLSI Algorithms and Architectures* (1988 Aegean Workshop on Computing) *Lecture Notes in Computer Science 319*, Springer, N.Y. (1988) 160–169.

88. (with L.S. Heath, B.T. Smith): "The physical mapping problem for parallel architectures." *J. ACM 35* (1988) 603–634.

89. "On validating parallel architectures via graph embeddings." In *Concurrent Computations: Algorithms, Architecture, and Technology* (S.K. Tewksbury, B.W. Dickinson, S.C. Schwartz, eds.) Plenum Press, N.Y. (1988) 99–115.

90. (with S.N. Bhatt, F.R.K. Chung, F.T. Leighton): "Universal graphs for bounded-degree trees and planar graphs." *SIAM J. Discr. Math. 2* (1989) 145–155. See also, "Optimal simulations of tree machines." *27th IEEE Symp. on Foundations of Computer Science*, Toronto, Canada (1986) 274–282.

91. (with J.F. Buss, J.D. Knott): "Vertex-types in book-embeddings." *SIAM J. Discr. Math. 2* (1989) 156–175.

92. "Interval hypergraphs." In *Graphs and Algorithms* (R.B. Richter, ed.) *Contemporary Mathematics 89*, Amer. Math. Soc., Providence (1989) 27–44.

93. "Efficient emulations of interconnection networks: A formal framework and a case study." *Computer Architecture News*, December, 1989; presented at poster session *16th Intl. Symp. on Computer Architecture*, Jerusalem, Israel (1989).

94. (with D.S. Greenberg, L.S. Heath): "Optimal embeddings of butterfly-like graphs in the hypercube." *Math. Syst. Th. 23* (1990) 61–77.

95. (with F. Annexstein and M. Baumslag): "Group action graphs and parallel architectures." *SIAM J. Computing 19* (1990) 544–569.

96. "Exposing graph uniformities via algebraic specification." *Math. Syst. Th. 23* (1990) 227–244.

97. (with S.N. Bhatt, F.R.K. Chung): "Partitioning circuits for improved testability." *Algorithmica 6* (1991) 37–48. See also, *Advanced Research in VLSI* (C.E. Leiserson, ed.) MIT Press, Cambridge, Mass. (1986) 91–106.

98. (with M. Baumslag): "Processor-time tradeoffs for Cayley graph interconnection networks." *6th Distributed Memory Computing Conf.*, Portland, Ore., IEEE Computer Society Press (1991) 630–636.

99. "Cycles in networks." Tech. Rpt. 91-20, Univ. Massachusetts (1991).

100. (with S.N. Bhatt, F.R.K. Chung, F.T. Leighton): "Efficient embeddings of trees in hypercubes." *SIAM J. Computing 21* (1992) 151–162. See also, "Optimal simulations of tree machines." *27th IEEE Symp. on Foundations of Computer Science*, Toronto, Canada (1986) 274–282.

101. (with L.S. Heath, F.T. Leighton): "Comparing queues and stacks as mechanisms for laying out graphs." *SIAM J. Discr. Math. 5* (1992) 398–412.

102. "Product-shuffle networks: Toward reconciling shuffles and butterflies." *Discr. Appl. Math. 37/38* (1992) 465–488.

103. (with L.S. Heath): "Laying out graphs using queues." *SIAM J. Computing 21* (1992) 927–958. See also, "Graph layouts using queues." *28th Allerton Conf. on Communication, Computation, and Control*, Monticello, Ill. (1990) 305–314.

104. "Cayley graphs and direct-product graphs." *DIMACS Series in Discrete Mathematics and Theoretical Computer Science, Volume 11* (L. Finkelstein and W.M. Kantor eds.) American Math. Soc. (1993) 245–251.

105. "Better parallel architectures via emulations." In *Parallel Architectures and Their Efficient Use: Proceedings of the 1st Heinz-Nixdorf Symp.*, Paderborn, Germany (F. Meyer auf der Heide, B. Monien, A.L. Rosenberg, eds.) *Lecture Notes in Computer Science 678*, Springer, N.Y. (1993) 30–36.

106. (with S.N. Bhatt, G. Pucci, A. Ranade): "Scattering and gathering messages in networks of processors." *IEEE Trans. Computers 42* (1993) 938–949. See also, *Advanced Research in VLSI and Parallel Systems 1992* (T. Knight and J. Savage, eds.) (1992) 318–332.
